<Some tips for calling an ambulance>

- ① Unconscious (no response) or stupor
- ② Sudden shortness of breath or difficulty in breathing
- ③ Continuous convulsion
- ④ Vomiting or nausea with due to strongly hitting head
- ⑤ Trauma with massive bleeding
- ⑥ Sudden severe pain
- ⑦ Any other situation in which the patients

30 chest compressions

Both arms in line with sternum

- Push the center of the chest
- Push 100 to 120 times per minute.
- Push the center of the chest 5 to 6 cm down

Center yourself directly above compression point

If you know how, clear the airway and give 2 rescue breaths
When rescue breaths cannot be given, do chest compressions continuously.

Continue CPR until Emergency Medical Service arrives
